

CIT 155: Web Page Development

Chapter 5 Lab 1

Complete Lab1 in your textbook on pages 271-273. I will attach the files designated in the directions.

There are some corrections to the directions in the book.

1. On step 3, the `<div id="hero">` tag is only in the index.html file. It is not in any of the other html files.
2. On Step 8 you may choose any of the options given for the Roboto font.
3. When adjusting the font-family for the header h1 to the stylesheet use:

font-family: 'DM Serif Display', serif;

4. For the style for the main style rule use:

font-family: 'Roboto', sans-serif;

5. Be cautious on step 19. It is not referring to the #contact style.
6. Make sure you validate the 4 html documents and the stylesheet. I will take points off if they were not validated, or the validation errors were not fixed.
7. Compress all pages, including the folder that contains the css file and the folder that contains the images, to a zip or rar file and submit.
